

Zip Chilltower Drain Fitting Instructions

Please read through these instructions before proceeding

Please note you will require suitable 2.5mm, 3mm and 14mm drill bits.

1. Remove the drip tray and using the dimensions below mark the hole locations:

2. Carefully drill the holes and clear any swarf.

3. Fit the drain adaptor and fix in place using the screw provided.

4. Pass the drain tube with John Guest fitting attached through the back of the Chilltower.

5. Push the John Guest fitting onto the drain adaptor making sure it is pushed on all the way (see photo).

6. Using a 3mm drill, drill the drain hole in the bottom of the drip tray.

7. Replace the drip tray and the drain facility is now installed.
